DELTA SIGMA HEAR ADDRESS

Mr. Laski's Subject, "The Function of a University."

ROOM FOR IMPROVEMENT

In Our Social and Academic Standards of Education in Canada.

Yesterday, at 4 o'clock, Mr. Laski gave a most interesting address to the members of the Delta Sigma Society of the R. V. C. He spoke earnestly and admonishingly upon the function of the university. The function of the university, he said, is education—that is, preparation for intellectual freedom and not merely the turning out of good lawyers, doctors and other professional men and women. The true significance of the letters B.A. attached to a man's name is that he is capable of turning his mind to the production of thought. The university teaches us, both men and women, to think and how to better citizens. This is not the common comprehension of the function of a university; too often it is regarded as a stop-gap between school and business or social life, but in view of the many social problems with which we are surrounded, it should be considered more seriously. Oxford has produced more statesmen and national teachers than any other university. In Canada, we, too, have our pressing social problems, larger and more urgent than many of us imagine. Do not our universities teach us how to face these?

The study of classics or chemistry is not a complete guide to life. When we graduate we should consider our course as a beginning and not an end. University men and women are servants of the community, who have special privileges and responsibilities. We must realize our brotherhood. Athletics give us this sense of comradeship. We learn to care for something bigger than the individual; we learn that we are organically one. What part McGill will play in the life of Canada depends on us. New problems will arise after the war and old ones will be intensified; the problems of immigration, of capital and labor, of the position of women. The college women should have something to say to these, who are trained equally with men. As regards immigration, what an inadequate use we are making of the material coming into our country. It is not contributory to our art, music and literature as it might do. There is ample scope for work in this field. Mr. Woodsworth reminds us in his lectures. It has taken war to wake us up to the significance of social problems.

In our schools also there is room for improvement. The first two years of the university course are spent on work which should have been done at school, so that when we graduate we are still two years behind graduates of Oxford or Cambridge. If this is so, then we, the university men and women, should improve the schools.

We must regard ourselves as citizens of the state who are bound to contribute to its national life. We should interest and educate ourselves about the problems of Canada. Woman will become part of the electorate, and then they will have to exercise certain rights. Our ambition should be to make Canada bigger and better, not merely to succeed in a profession.

Miss Cameron thanked Mr. Laski for his interesting and instructive address in a short speech, and then all present adjourned to the dining room for tea.

THEOLOGUES AND DONALDAS MEET

Enjoyable Afternoon Spent on Tennis Courts of Diocesan College.

On Saturday afternoon last a very enjoyable afternoon was spent on the tennis court of the Diocesan College. At the invitation of the theologues, the ladies of the R. V. C. to the number of a dozen or so came armed with tennis racquets for a friendly game. Some eight or ten sets of mixed doubles were played until darkness compelled an unwilling interruption to the proceedings. In spite of the unseasonable weather for tennis, the players enjoyed the games to the full. Miss Steady, the lady superintendent of the college, served tea in the library.

It would appear to be the general desire of the students of Diocesan to extend the bounds of co-operation further than with the other theologues.

UNION MEETING.

A special meeting of the members of the McGill Union has been called for this evening, Nov. 11th, at 5.30, in the Lounge Room of the Union. Business: To discuss the question of extending the privileges of the Union to the 5th Universities Overseas Company. G. M. WILKINSON, President.

A MOCK COURT WILL BE HELD

Law Men to Argue an Interesting Case.

AT STRATHCONA HALL

Hon. Judge Greenshields, of the Supreme Court, Has Consented to Hear the Case.

The moot court, or mock court as it is more generally called, is to be revived amongst the Law men, and its first session will be held in Strathcona Hall on the evening of Friday, Nov. 19, at 8 p.m. The credit for this re-establishment is due J. N. Beauchamp, Law '16, and president of the Law Undergraduates, who first made the proposal and undertook all the necessary work in connection with it. With him in the chair the meeting held Tuesday evening completed arrangements and gave out the following case for argument:

B.—Plaintiff,
vs.
A.—Defendant.

A. the owner of a lot of land bearing the cadastre No. 85, signs the following document, dated June 1st, 1915 and on that date delivers same to B.—"I, the undersigned, A., give to B. or any other person assigned by him the option on my property, cadastre No. 85, for the sum of \$1,000.00, payable on the passing of the Deed of Sale. This option to expire on the first of November, 1915."

On the 15th of July, 1915, before B. has communicated in any way with A., but still having the option in his possession, A. writes to B. withdrawing and cancelling said option.

B. answers refusing to acquiesce in such cancellation, and on the first of September, declares in writing, that he accepts the option, desires to exercise the same, and offers the purchase price to A. and demands a Deed to the property.

A. refuses. B. thereupon institutes an action against A. renewing his tender of the purchase price of the property and demands a title.

H. Budyk, Law '16 and T. J. Kelly, Law '17, are acting for the plaintiff, and J. P. Charbonneau, Law '16, and Frank Common, Law '17, for the defendant.

Hon. Judge Greenshields has consented to have the case heard before him.

The senior counsels will have 15 min. each to speak, the junior counsels, 10 min. each. With 4 min. for the plaintiff's counsel to reply.

The meeting will be conducted more in the form of a debate than of a real court trial. Anyone who is at all interested is invited to attend.

Refreshments will be served.

What's On

To-day.

Nov. 26—Nominations close for faculty representatives on Students' Council.

Dec. 6—Students' Council elections.

GRADUATE MADE MAYOR.

Dr. Lewis G. Hunt, Med. '77, is Elected Mayor of Richmond-on-Thames.

A Canadian Associated Press despatch says that Dr. Lewis G. Hunt, Med. '77, a Nova Scotian, who has resided in England many years, but is still a constant visitor to the eastern provinces, was on Tuesday elected mayor of Richmond-on-Thames.

Speeches at the inaugural ceremony were delivered by Fred. Salter, European manager of the G.T.R., and John Howard, agent-general of Nova Scotia. The new mayor, in replying, alluded with especial pleasure to his intimate connections with Canada, with which Richmond was now closely associated by reason of many Anglo-Canadians residing within its borders.

GOOD PAPERS ARE OFFERED

Historical Club Hears Discussion on Dreadnought and Submarine

INNOVATION INTRODUCED

Only Two Papers Were Read Instead of Three as Formerly.

Another club got away to a good start last night when the Historical Club held its first meeting of this session at the Hon. President's home. Mr. H. Nichols, the President, called the meeting to order and asked Mr. R. deW. Scott to read the minutes of the previous meeting. This was done and the reading was adopted.

The Secretary reported that, as two members had resigned and two other men had proffered their names for election, it was in order to have them put to the vote. Accordingly, Messrs. Claxton and Holling were elected as regular members. The club now has twenty-two on its roll. Since business was exhausted, the first speaker for the night, Mr. H. Nichols, then rose to give his paper on "The Dreadnought."

The first subject of "Dreadnoughts" was dealt with in a very interesting way by Mr. H. L. Nichols, who explained that he had tried to treat the subject from a general, as opposed to a technical point of view. The Dreadnought, the speaker said, was still the backbone of the navy, and it is to this class of ship alone that England owes her position as mistress of the seas. It is by a country's strength in "capital" ships that her naval power is estimated. Much has been written, especially in the republic to our south, concerning the production that the submarine would supplant the dreadnought in naval importance, but this has not been proven true by the events of the present war. The Dreadnought, while being an evolution of the battleship, is at the same time a distinctly new type of ship, the most important feature being the elimination of the secondary armament, which left the ship with only big guns, placed in the centre line to enable them to direct all their fire at any one point.

The speaker traced the development of the Dreadnought from the early Majestic type to the present well-known Queen Elizabeth. This ship has a displacement of 27,500 tons, and the remarkable speed of 32 knots per hour; she is armed with ten 15-inch guns—the heaviest fired by a British warship—and marks a new departure in that she depends upon oil fuel.

Mr. Nichols then gave a graphic account of the battle in the North Sea, when the Bluecher had been sunk. In this engagement the British ships, with the same theoretical speed as the Germans, succeeded in drawing up on them within a few minutes from 14 miles to 17,000 yards, at which distance the British dropped shells on the Bluecher even when that vessel was below the horizon. The British found it easy to fire on ships in line, and thus made short work of the slowest one. This battle is important in proving the effectiveness of the English slow and accurate system of firing as opposed to the more rapid and wilder fire of the Germans. The speaker by pointing out that the tendency in naval engineering is for bigger guns and smaller ships, the latter being attributed to the introduction of oil fuel.

A general discussion followed which revealed many interesting facts relating to the subject of the previous paper. When everyone had expressed their opinions, Mr. Marotte read a paper on "Submarine." The speaker gave

(Continued on Page 4.)

LAW FRESHMEN HOLD DISCUSSION

Interesting Speeches Delivered At Opening Meeting of Class Society.

On Tuesday last, Law '18 started its weekly discussions on law and allied topics. The purpose of this innovation is of a two-fold nature; viz., to develop forensic ability so essential to men who intend to be called to the Bar, and to make themselves familiar with the law. That such a purpose would be realized was shown by the splendid example set by the first three speakers. Mr. M. Lehrer, the first speaker, discussed the Seigneurial Act and its advantages. Mr. L. Diner, who followed, gave a resume of the quarrels between the Intendants and the Governors during the French regime. Mr. W. F. Bowles, the last speaker dealt with the subject, "The Seigneur and the Inhabitant."

The meeting was then thrown open to general discussion, after which the meeting adjourned.

PHYSICAL EXAM.

Dr. Harvey will be at the C. O. T. C. headquarters at 8 o'clock every evening this week for physical examination of men in competitive athletics.

Wanted---Concentration!

It is evident to all who have devoted any attention to the matter that McGill has a superabundance of minor clubs and societies to maintain, and to give them the support necessary for prosperity, is at any time a most difficult matter. All the more so is this the case at a time like the present when those in charge of the direction of students' affairs and organizations find themselves faced with the barrier of a decreased registration and consequently of a decreased revenue with which to carry on whatever work may come under their control. Lack of time is possibly the most formidable excuse with which the man who hopes to put his particular activity on its proper basis is confronted. It is also one of those which cannot be accepted in an entirely satisfactory manner so long as the present number of undergraduate organizations continues under the present circumstances.

It must also be evident that in the case of several of these societies, at least, there is an overlapping of activities which might well be centered in one main body, carrying on its work in affiliation with other organizations, which have much in common so far as their objects are concerned and which differ in little other than name. An example of this may be seen in the case of the Literary and Debating Society, the Canadian Club, the Dramatic Society, and the English Club. All these have been called into existence to serve purposes which are much akin. Under the present system the word "Literary" might quite reasonably be dropped from the title of the Literary and Debating Society; it confines its attention almost entirely to the promotion of public speaking and in this is showing commendable enterprise and energy. The purpose of its establishment, however, was, we believe, to cover a much wider field than this, a field which under cultivation would warrant the retaining of the term "Literary," embracing much of the work which other organizations have seen fit to incorporate in their activities and have carried on to the best of their abilities. The Canadian Club enjoyed a most prosperous existence for a number of years, and brought many prominent statesmen and men of affairs to the University to address its members, the student body; it now has no officers, with very little prospect of ever having any, and to all accounts and purposes may be reckoned as dead, a state of affairs which, although lamentable in the extreme, is only a fair instance of what happens under the system of decentralization. The Dramatic Club is in much the same position, it has done most useful work in the past, but has now neither officers nor organization. The English Club, formed last session to further interest in matters arising from the activities of the Department of English, and particularly in the drama, has never held a meeting. Why could not the activities of all these three organizations be embodied in those of the Literary and Debating Society, which this session seems to be in a more prosperous state of existence than has been the case for several sessions. This is the system which is in operation at more than one University. At the University of Alberta, for example, the Literary Society is the governing body of not only the Dramatic Society, and the Debating Union, but also of the Orchestra and the Glee Clubs. At the opening meeting for this session, all these organizations united for the purpose of giving a public entertainment. In this way the Lit. would become a many-sided institution, which would do much towards accomplishing a reaction in favor of an organization which is unjustly referred to fit only for a "Dryasdust."

HARD ON OLD CORNELL.

Faculty Committee Ask Students to Reduce Athletic Expenses.

Just as the Cornell undergraduate body has prepared itself for the glorious climax of a football season that would find their eleven acknowledged champions of the East, there has been published a series of recommendations by the faculty committee on student affairs which if adopted would put in effect here an athletic policy designed to curtail schedules, reduce expenses and embarrass or cripple most of Cornell's great athletic teams. The report has caused a mild sensation in undergraduate circles, has stirred to wrath the friends of athletics and undoubtedly will lead to a country-wide appeal to the alumni.

Without singling out any team the recommendations with reference to the time a student may be away from the university, and urging the reduction of expenses, undoubtedly strikes at football, the great revenue producing sport.

HARVARD TEAM RESTS.

Regulars Take No Chances As Hard Game is Anticipated With Brown.

The Harvard regulars have had two days' rest. None of the players who were in the Princeton game reported for practice except McKinlock, Harris and Weatherhead, and they were in the game only during the last few minutes. The substitutes had a light scrimmage with the second team. Brown, the Crimson's next opponent, has an excellent chance to defeat Harvard, unless the present plan of sending most of the Varsity regulars to watch the Yale-Princeton game is changed. Last year Brown held Harvard to a scoreless tie because the regulars were scouting Yale. The Crimson is to be taught fear of Yale mostly during the next few weeks. Haughton and other coaches, remembering how the Shevlin-coached Yale team of 1910 held a mighty Harvard team scoreless after Brown had beaten Yale 21 to 0, will take no chances this year.

FAMOUS POEM IS NOT FOR MCGILL

Manuscript of Macaulay's Latin Poem for Trinity.

MANY LARGE OFFERS MADE

Mr. A. E. Redpath Made Attempt to Secure Famous Poem For McGill Library.

Many bookbuyers have for some time past been deeply interested in the sale of the manuscript of Macaulay's Latin poem. Amongst others interested was Mr. A. E. Redpath, whose desire it was to place this manuscript in the McGill Library. But Trinity College, Cambridge, after outbidding the other buyers, has succeeded in securing the poem. The following is a clipping from the London Times and contains several of the written offers, including that of Mr. Redpath:

£70 For the Red Cross.

To-day the manuscript of Macaulay's Latin poem, together with Sir George Trevelyan's letter and Sir Herbert Warren's translation, becomes the property of Trinity College, Cambridge, and the Times Fund received £70 10s from the sale.

The bidding was spirited to the last. Yesterday it was announced that the Master of Trinity, on behalf of "some members of Trinity College, Cambridge," offered £40. In the afternoon, Mr. A. Percy Eccles, of Caldy Manor, Cheshire, telegraphed an offer of £50 (subsequently increased to £60), with a view to presenting the documents to Uppingham School; later Mr. H. L. Hopkinson, a member of Trinity College, called to add ten guineas to the Master's offer; and in the evening a communication reached us from the Master's lodge to the effect that a further £20 had been collected. The documents, generously contributed by the Rev. J. O. H. Carter, whose interesting letter appears below, were published in the Times of October 13.

It will be generously agreed that no more appropriate place than the library of Trinity College could be found for this tribute to Cambridge by one of the most distinguished sons of that college and university.

To the Editor of the Times:

Sir,—It may be of interest, not only to the purchaser of the poem, but to others of your readers, to know how this valuable scrap of paper came into my possession.

At the sale in Oxford of the books of Dr. Bright, the ecclesiastical historian, a stranger (not, I think, an Oxford book-buyer) invested 16s in a miscellaneous parcel containing perhaps a dozen books. As he cut the string to see of what has bargain consisted, there dropped out of one of the volumes a paper. He passed it to me, asked what it was, and on hearing what I thought it might be, he said: "You are quite welcome to it if it is of any use to you." As my interest in autographs is of very long standing, the offer was of course accepted with gratitude; and one may hope that, if the unknown donor should happen to see this letter, he will approve of the use to which his gift has now been put, and not regret his kind impulse.

Some months ago I searched for it, but in vain. A chance visit of two strangers from the sister university, attracted by the fact that we, too, have a Cambridge in Gloucestershire, led to a hearty break in the quiet routine of a country parson's life, and the rediscovery by one of the visitors of the poem in one of my own books.

Those who have helped in the matter acknowledge with gratitude the very generous prominence given to it by the Times on behalf of its fund for the Red Cross, and its aid in producing such a substantial sum for Macaulay's asclepiads. May I venture to suggest that other possessors of interesting autograph documents, who are unable to help the fund in a more direct way, should form the nucleus of a collection to be sold by auction for the benefit of the fund? I should be glad, if it seems well to you, Sir, to adopt this suggestion, to add one or two, but not, I fear, any of equal interest to the one which is the subject of this letter.

Yours very truly,

J. O. H. CARTER.

Slymbridge Rectory, Stonehouse, Glos.

The Master of Trinity informs us that "some members of Trinity College, Cambridge," are prepared to pay £40 for the manuscript of Macaulay's poem, together with Sir George Trevelyan's letter and Sir Herbert Warren's translation, published in the Times of October 13. Any higher bid should reach the editor's secretary, Printing House Square, E. C. 4, before 12 o'clock to-night.

The proceeds of the sale will be given by the owner, the Rev. J. O. H. Carter, to the Times Fund for the Sick and Wounded.

To the Editor of the Times:

Sir,—I am making a bid by wire for Macaulay's poem (20 guineas). If I should be successful it is my intention to hand over the MS. to the Redpath Library, McGill University, Montreal, Canada.

Yours faithfully,

A. E. REDPATH.

Harbledown Lodge, Southfields Road, Eastbourne, October 19.

To the Editor of the Times:

Sir,—I shall be pleased to give 20 guineas for the MS. of Macaulay's poem, the money to go to the Sick and Wounded Fund.

Yours faithfully,

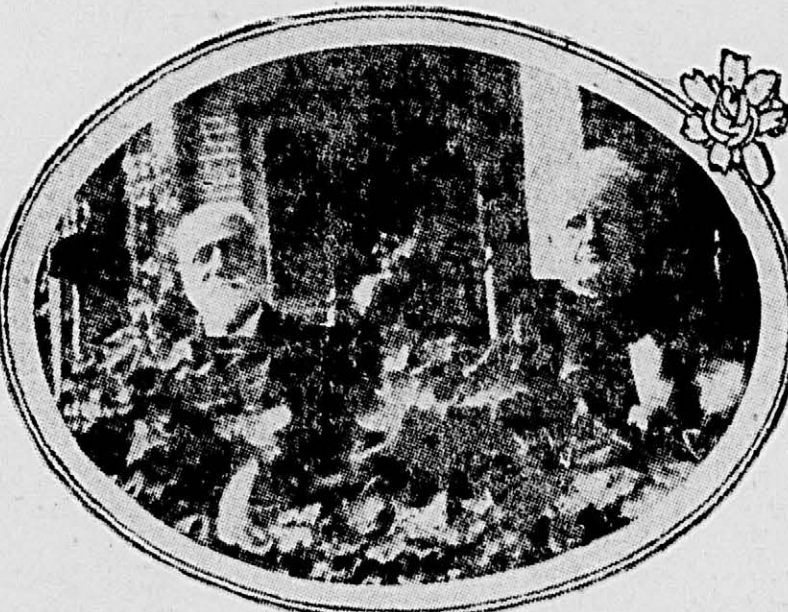

T. R. HUGHES.

8 Old Square, Lincoln's Inn, W.C., October 19.

WESTERN CLUB MEETING.

A meeting of the executive of the Western Club will be held this evening at 7 o'clock, in room B, Strathcona Hall.

Oldest Living McGill Alumnus Passes Away

A Brantford despatch of yesterday's date announces the death at the age of 96 years, of Dr. A. Bowlby, of the village of Waterford, Ont. The late Dr. Bowlby and Mrs. Bowlby are shown in the above cut on the occasion of their diamond jubilee in 1914. Dr. Bowlby attended the old McGill Medical School in the years 1845-6 and had he graduated would have been McGill's oldest graduate. As it is, he was McGill's oldest past student. J. W. Bowlby, K.C., of Brantford, Ont., is a brother.

JUNIORS VISIT THE SICILIAN

Science Men Under Captain Heward Examine Vessel.

SHOWN SHIP'S MACHINERY

Carefully Scrutinize All the Mechanism of Allan Liner.

The third year mechanical engineering students yesterday had the second excursion. This time piloted by Captain Heward, the third year mechanicals visited the Allan Liner Sicilian, and as the trip looked so promising the mechanicals of the fourth year decreed a holiday and took in the trip along with the third year.

Shortly before three o'clock the party left the Allan Line offices on Common street and proceeded to the company's dock where the Sicilian was moored. On boarding ship the party was divided into three sections, one under Captain Heward, one under the chief engineer, and the other under the second engineer. This was done in order that all might more minutely examine the different parts.

One of the parties went first to examine the engine room on the main floor of the ship. These engines develop between 3,000 and 3,500 H.P. An interesting point in the construction of the engine is the hollow engine columns, which contain the lubricating oil. Each column being capable of holding 240 gallons of oil.

In the boiler room there was seen boilers with the down draft system. Many interesting machines were here in evidence and due to the manner in which their workings were explained much useful information was obtained. Here the Weiss pump with its intricate valve motion, the evaporator for boiler feed water, and the reversing mechanism were the principal features.

The party then went along the "ally" to the thrust bearings and the stern bearing. The hollow shaft, which is coupled to the engine is 15 inch. in diameter, with a 4-inch hole in the center.

On the second grating the refrigeration machine was the source of attraction. This machine consists of a steam engine with a high and low pressure cylinder, and a compressor. The Sicilian is equipped with a specially air cooled storage room to preserve perishable goods during the ocean voyage.

The steering engine was investigated very thoroughly. As the mechanism was much involved when everything mechanical had been examined, the whole party was shown through the passengers quarters. The cabins presented a very lonely appearance, and it was the desire of many to remain on board for a voyage.

Owing to the extreme courtesy of the officials and crew the mechanicals saw many things worth while, and returned satisfied with having spent a pleasant and profitable afternoon.

INTERESTING LECTURE.

President of Sherwin-Williams Company Will Speak on Business Organization.

W. H. Cottingham, president of the Sherwin-Williams Company, will give a public lecture on "Business Organization" on Monday evening next, Nov. 15. The lecture will be given in the Chemistry Building at 8.15. G. F. Benson, president of the Board of Trade, will preside.

SEND SMOKES TO THE FRONT.

The Presbyterians agreed last Tuesday evening to send Christmas presents of cake, candy and tobacco to the members of the college at the front.

ARTS '16 PICTURE.

The class picture will be taken on Friday, Nov. 19, 1915, instead of Friday, Nov. 12, at Rembrandt's Studio.

IMMIGRATION TOPIC AT R.V.C.

Big Audience Heard Mr. Woodsworth Give Fine Address.

Colleges, Important Factor

Students Must Help in Making Good Citizens of Aliens.

"Immigration" was the topic on which Mr. Woodsworth spoke to a large audience in the R.V.C. yesterday. The lecture may be said to answer the question, "What shall we do with our immigrants, and what will they do with us?" Charts showed statistics, contrasting the influx of foreigners into our country in 1917 with that of 1901—over three million in those sixteen years. In fact the whole of Montreal could be entirely re-peopled by those immigrating to Canada in eighteen months.

Mr. Woodsworth spoke very strongly against the use of the word "foreigner." Italian, German, Russian, etc., they may be, but not in the strict sense of the word "foreigners."

The speaker emphasized the great part the universities have to play in naturalizing our immigrants. Are the students, who have received the best the country can give them, not going to give something in return? Canada is far behind the States in literature and careful study of the immigration problem. Canada has no Myro Kelly or Jane Addams. Are Canadians going to stand for this? There are countless openings for university graduates; especially must women come forward in the present time of war.

Things Theatrical

AT THE LONDON.

"Caught in a Cabaret," a two-part Chaplin comedy, will be screened at the London to-day and to-morrow (Thursday and Friday). In the run of things, Charlie is as usual very funny, and his antics to provoke laughter follow one after another when he starts out about 11 p.m. and sojourns in a cabaret show.

This programme will also include, besides two one-reel subjects, a three-reel drama of the Northland, showing forest wilds and general matters in connection with this end of the world. Hobart Henley and Lucille Maxm are in the leading roles when the photograph has been produced by Henry Otto.

For Saturday's and Sunday's programme at this amusement resort, a gripping four-act master-piece has been obtained by the management. It is entitled "The Girl from His Town," and throughout features romance, love and intrigue. The picture was produced by special arrangement with M. von Vorst, authoress, and Bobbs-Merrill Co., publishers.

For this programme also there will be a Charlie Chaplin comedy entitled, "Rounders," and any one with his blues should see this film.

NO LICENSE REQUIRED.

Medical Practitioners Without a License May Now Join C.A.M.C.

Instructions were received yesterday from Ottawa at the 4th District Militia headquarters that in future medical practitioners not possessing licenses to practice in one of the Canadian provinces may be enlisted as officers either on the C.E.F. medical staff or in the Royal Army Medical Corps.

Previous to this change in regulations, qualified physicians who had not been granted licenses to practice were not eligible for service with the medical corps.

Goodwin's Special Christmas Box for Soldiers at the Front

SENT MAIL AND DUTY FREE.

JUST leave your soldier friends' names and military addresses, and we will attend to the rest.

Our London office has just completed the final arrangements for delivery to the front. We provide special cards on which you may write your signature to be enclosed in the boxes.

Sample boxes may be seen in the Grocery Department—Basement—Get ready to rush your orders.

Mail orders accepted from all over the country.

Enclose \$1.50, and your personal Greeting Cards.

CONTENTS OF BOX

1 Tin Christmas Plum Pudding;	1 Tin of Mint Rock;
1 Jar Salmon Paste;	1 Package of Tobacco;
1 Tin Lime Fruit Tablets;	1 Package of Cigarettes;
	1 Tin Antiseptic Powder (for sore feet).

PRICE — \$1.50 — a Box
ORDER EARLY

Goodwin's LIMITED

ORCHESTRA PRACTICE.

There Are Still a Few Vacancies in the String Section.

A rehearsal of the orchestra will be held in the Strathcona Hall this evening, at 7.30 o'clock sharp. All members are expected to be up. There is still room for new men, especially in the string section. Every McGill musician ought not to hesitate and attend.

INCREASE IN ENLISTMENTS

238 Students Now Enrolled in the Battalion.

FROM ALL FACULTIES

Arts, Science and Theology Are All Well Represented.

According to information available at C.O.T.C. headquarters, there are now 238 students enrolled in the contingent. These are the following:

88. McNabb, G. K.
90. McNabb, W. S.
92. Hutchison, M. H.
94. Thompson, G. D.
96. Smith, W. Harry.
97. Bourke, G. W.
117. Schofield, J. H.
126. West, F. L.
141. Biggar, L. H.
147. Booker, H. K.
148. Fotheringham, J. B.
151. MacDermot, T. W. L.
152. Beattie, J. D. M. B.
153. Claxton, B. B.
158. Beattie, W. W.
159. Terroux, A. M.
160. Heslam, G. H.
169. Scott, R. D.
171. Murtha, D. T.
173. Marotte, E. S.
176. Hoady, C. W.
180. Brady, W. H.
183. Farthing, J. C.
185. Kennedy, R. A.
186. Kirsch, M.
194. Butterfield, H. D.
195. Cole, S. W.
201. Dawson, S. A.
209. Timmerman, E.

SENIOR HOCKEY TEAM SCHEDULE

McGill to Play in City Hockey League.

FOUR TEAMS ARE ENTERED

First Match Against the Nationals to be Played on December 20th.

The revised schedule of the Montreal City Hockey League, in which a McGill senior team is entered, is as follows:

- Dec. 20—M. A. A. A. vs. Shamrock; McGill vs. National, Laval vs. Victoria.
- Dec. 27—Victoria vs. National; McGill vs. Shamrock; M. A. A. A. vs. Laval.
- Jan. 3—M. A. A. A. vs. McGill; Laval vs. National; Shamrock vs. Victoria.
- Jan. 10—Shamrock vs. Laval; Victoria vs. McGill; M. A. A. A. vs. National.
- Jan. 17—M. A. A. A. vs. Victoria; Shamrock vs. National; Laval vs. McGill.
- Jan. 24—National vs. McGill; Shamrock vs. M. A. A. A.; Victoria vs. Laval.
- Jan. 31—Laval vs. M. A. A. A.; National vs. Victoria; Shamrock vs. McGill.
- Feb. 7—National vs. Shamrock; McGill vs. Laval; Victoria vs. M. A. A. A.
- Feb. 14—McGill vs. Victoria; National vs. M. A. A. A.; Laval vs. Shamrock.
- Feb. 21—National vs. Laval; McGill vs. M. A. A. A.; Victoria vs. Shamrock.

PROF. DU ROURE, PRISONER

From Mayence, Neuge, Gaudent, in Silesia, Germany, comes a letter from Prof. Rene du Roure, formerly of the Department of Modern Languages, later a soldier for France, and now a prisoner in the German internment camp. Prof. du Roure was taken prisoner eight months ago, after having been wounded in the thigh. He sends greetings to his friends in Montreal, and pays a high tribute to the valor of the Canadian troops.

METALLURGICAL SOCIETY MEET

Address Given by Major C. L. Cantley.

A LARGE ATTENDANCE

"The Supplies of Iron and Steel" Was Subject of the Meeting.

The subject before the meeting of the Metallurgical Association last night was "The Supplies of Iron and Steel in Canada." This topic is subject to very wide debate in metallurgical, and was copiously dealt with last evening.

The meeting was called to order at 8.30 in the lecture room of the Chemistry Building with a large number in attendance. Dr. Stansfield, the president of the association, opened the meeting. In view of the fact that Mr. E. W. Tilt, the secretary-treasurer of the society, was absent in England, the minutes of the previous meeting were read by Mr. A. K. Drury, the honorary secretary-treasurer.

The speaker of the evening, Major C. L. Cantley, was then given the floor. It was not without regret that the meeting noted Colonel Thomas Cantley's inability to deliver the paper he had so carefully prepared before his unexpected call to England. Colonel Cantley, as president of the Nova Scotia Steel and Coal Co., is well qualified to prepare a paper on this subject. It may be stated his son, Major Cantley, of Science '09, was well able to fill his place last evening, as he covered the question in a masterful manner.

The paper prepared started with a history of the iron production in Canada, which began about 1825. From this date on the different steps in the growth of the iron and steel production of Canada were discussed. It was shown that the production may be divided into two altogether different producing sections, the one Nova Scotia and the other Ontario, both operating under extremely different economic conditions. That this division may be made along metallurgical lines was fully brought out by figurative statistics compiled in the paper. In summation, this division is due to the fact that Nova Scotia is nearly self-supporting in its requisites for the manufacture of iron and steel, while Ontario, due to its poor resources in this line, imports almost all of its ore, fluxes and coke used in its production from the United States, and also from Newfoundland and Nova Scotia. Under each division as a heading, the production was taken up, also the plants now in operation in each district.

The sources of materials imported and the amounts thereof were brought out in the paper. All figures were based on the iron and steel report for the fiscal year ending January 1, 1914, for 1913 is the last year for which figures relative to tonnage produced and to exports and imports in relation to the Canadian iron and steel trade.

In view of the turn for the better which the steel trade has taken, it was brought out emphatically that for 1915 the steel production should be in excess 1.3 million tons. This is a very astounding tonnage for a steel output. Major Cantley was very earnest in the praise he gave to the late Sir Charles Tupper for his never-ending efforts to build up Canada's iron and steel trade. It was due to his realization of the importance of getting a good fundamental basis for this wide and flourishing business that has placed Canada in such a strong position as she holds today.

Major Cantley points out that the enormous production for 1915, which is only half of what it might be, is due to the efforts of the Canadian Shell Committee at Ottawa, who have succeeded in diverting many large orders for munitions into the hands of the Canadian manufacturers, which orders would have gone to the United States.

The paper gives statistics to show that the exports of Canada have grown to an enormous extent, as to completely overshadow the imports into this country. And it is the steel industry—due to munitions manufacture—which has led to the outshading.

Over \$100,000,000 worth of munitions orders have been placed and booked in Canada from October, 1914, to June 30, 1915, and over four million shells have been exported. The economic advantages of this growth in the steel trade were splendidly brought out in Major Cantley's paper. He pointed out that men are now being employed in this industry who otherwise would be without work. The lumber business has been boomed, for wooden ammunition boxes are needed.

CORRECTED LIST NOW PUBLISHED

Names of Men Choosing Gymnasium Work.

132 FRESHIES TAKE GYM.

Must Remember Numbers As It Is By Them That Attendance is Kept.

The following is the corrected list of men choosing gymnasium work as their physical activity. All students must familiarize themselves with their numbers, as it is by the numbers that attendances are recorded:

1. A. Savard; 2. H. Popham; 3. M. Clayton; 4. G. S. Pincus; 5. G. H. Illner; 6. —; 7. A. H. Curran; 8. J. M. Vaughan; 9. C. A. Pelletier; 10. A. H. McLean; 11. R. A. McRae; 12. —; 13. H. C. Irving; 14. T. Millar; 15. F. A. Wintle; 16. J. L. Duffy; 17. H. S. Brown; 18. L. A. Blenjouette; 19. J. W. Bagg; 20. H. M. Beach; 21. A. Sholten; 22. A. Drabkin; 23. R. W. Farmer; 24. L. A. Bishop; 25. A. Davis; 26. A. S. Noad; 27. L. Bunt; 28. H. C. Brown; 29. H. C. Bussila; 30. H. A. Laurie; 31. R. F. Malow; 32. F. Bowles; 33. A. G. Anderson; 34. P. C. Amos; 35. —; 36. W. A. Porter; 37. C. H. Shiller; 38. R. R. dish; 41. L. Starke; 42. G. W. Call; 43. —; 44. D. N. McGregor; 45. —; 46. B. Joseph; 47. C. E. Taylor; 48. —; 49. —; 50. M. S. Cook; 51. —; 52. C. C. Cochran; 53. —; 54. J. M. Cross; 55. —; 56. W. Johnston; 57. G. A. P. McConey; 58. F. A. Kerr; 59. M. I. Golt; 60. C. A. Holland; 61. —; 62. C. M. Eaton; 63. —; 64. G. Goldwater; 65. H. Lamontagne; 66. W. L. Duncan; 67. D. Gardner; 68. A. Bulger; 69. N. Bettemy; 70. G. B. Elliott; 71. A. L. Farnsworth; 72. M. P. Whelan; 73. H. Fox; 74. H. H. L. Casselman; 75. D. J. Beach; 76. G. R. Brown; 77. M. Kober; 78. C. C. Jones; 79. —; 80. M. R. Wells; 81. M. Tison; 82. H. R. Wiggs; 83. R. W. J. Kramer; 84. J. L. McMahon; 85. G. A. Sherman; 86. G. Shaw; 87. W. C. Twedle; 88. C. E. W. Durant; 126. R. E. Hertz; 127. C. M. Hale; 128. —; 129. A. M. Thompson; 129. W. Fowler; 131. R. E. Lee; 132. J. G. Ahern; 133. J. P. Gilhooly; 134. C. L. N. Peters; 135. J. E. Montpetit; 136. E. Henderson; 137. E. W. H. Kirk; 138. R. M. Power; 139. A. E. C. Roy; 140. E. Goldwater; 141. E. M. Velasco; 142. R. J. Dunne; 143. B. C. MacLean; 144. Brandes; 151. J. E. Floyd; 156. Nichol; 157. J. S. Murry; 165. D. Fournier; 171. M. D. Morris; 173. B. D. Usher; 214. D. G. Kyle.

LIEUT. REID IN LONDON.

"Buster" Who Was Wounded is Now Recovering in England.

News reaches the University that Lieut. "Buster" Reid, Arts '15, who was wounded a short time ago, is now at London, shot in the hand and thigh. "Buster" was with the Third Battalion when wounded for the second time last week. He left Canada with the 23rd Westmount Rifles.

BATTERY IS FORMED.

First Drill is Held at Queen's and Much Enthusiasm is Shown.

The new Queen's battery had its first drill on Tuesday afternoon, and there was a good turnout of students. The men were put through the movements by Capt. Gill, and they responded with a vim and an alacrity, which promise great things in the near future for the members. The uniforms are expected in a few days.

After Mr. Mackenzie's dissertation, Dr. Stansfield put the floor open to debate on the questions already discussed.

After a few supplementary remarks, the secretary read a letter from Mr. J. F. Taylor, president of the Algoma Steel Corporation, who regretted his inability to be present, and enclosed an article prepared by Mr. D. E. Hogg, engineer of the company. In the article were discussed the pro. and con. of protective tariff on structural steel as a help in building up Canada's steel trade.

Letters were read from Mr. Cameron, of the Dominion Iron & Steel Corporation, and from Colonel David Carnegie, of the Canadian Shell Committee.

Dr. Stansfield went into a short discussion of Canada's steel trade, and then Major Cantley dealt with the subject on a more general basis for a few moments.

Mr. Robert Turnbull, of the Electric Metals Company, of Welland, Ont., then called upon to give a few remarks on the growth and chances of the electric steel produce of Canada.

The meeting adjourned after a few words on the subject of the evening by Mr. R. Job, of Hersey Limited, of this city, and Mr. Pascoe, who is connected with the Canada Steel Foundries.

This was the second meeting of the Metallurgical Association since the opening of the present college term. The meetings so far have met with very good support, being well attended.

It is to be regretted that more of the students do not turn up at these discussions and avail themselves of the opportunity of learning something of Canada's most fundamental and important trade.

HARRIERS HOLD LAST PRACTICE

Are Preparing for Inter-Faculty Meet Next Saturday.

BETWEEN ARTS AND SCI.

Antliff and Gerrie Come in Ahead After Stiff Run Over Course.

The last practice of the harriers, preparatory to the inter-faculty run on Saturday was held from the Stadium yesterday afternoon. Most of the men were resting up for Saturday and consequently there were only some half-dozen athletes out. Those on hand, however, put in a stiff workout over the greater part of the course, which will be covered on Saturday. Starting at the Stadium the runners struck off across Fletcher's Field to Esplanade Ave., which was followed to Mount Royal. After a short stretch on Mount Royal the mountain road was reached and followed as far as the incline, when a path was taken through the woods and home again over the same route. On the way out a fairly stiff pace was set which served to bring out the excellent shape into which a man can work in two or three weeks. After turning onto Mount Royal on the way back a race developed between Gerrie and Antliff for first place and Derrick, McLeod and Dowdall for third. The former two kept well together until Pine Ave., when Antliff sprinted ahead and won by a few feet. In the case of the latter three, superior condition was successful in bringing Derrick through a winner.

The inter-faculty run on Saturday has practically narrowed down to a contest between Science and Arts. The former have the makings of a classy team in Gerrie, Macklin, Wickenden, McLeod and Kert, but they do not appear to have anything on Arts, who will probably be represented by Antliff, McDermott, Walsh, Buchanan, Dowdall and Henry. There will also be a great deal of rivalry for individual honors as the first five men will receive their small M's. Each faculty can enter as many men in the race as they like and so there is no excuse for everyone who has any inclinations at all along the athletic line getting into the game.

GERMAN POTATO SUPPLY.

Berlin, Germany.—The question of the German potato supply still awaits a satisfactory solution. Prices are still far too high, and there is a scarcity of the product in many districts, while the most desirable method of procedure is still the subject of endless discussion in the newspapers, and of much official debate. Meanwhile, as a step towards reducing the prices and increasing the supply, the government has arranged for the formation of a potato supply company, whose function it will be to obtain potatoes from Lithuania and Russian Poland and to place them on the German market. It is estimated that from 12 to 15 million hundredweight of potatoes can be obtained in this way, and it has been stipulated that they are to be chiefly placed at the disposal of large towns and industrial centres.

The most fascinating of all sports

Trap-shooting! The "sport alluring"! The one great out door game that appeals to everyone—men and women—young and old! It's full of interest and excitement and with a little practice transforms the "couldn't-hit-a-balloon" amateur into a "crack shot".

Everywhere in Canada, trap-shooting clubs are springing up. If there's one in your town, join it. If not, let us help you to start one.

Get the trap-shooting habit. Also get the habit of shooting Dominion Shells, which are used by more Canadian trap-shooters than all other makes combined. The reason is simply "all round dependability"—the result of first class materials, a well equipped factory and workmen of the highest skill.

Look for the "Big D" on every box of Dominion Shot Shells and Metallics. It's a guarantee of perfection.

Dominion is "the ammunition made wholly in Canada", and sold everywhere.

Any trap-shooting information will be gladly supplied free upon request. Address:

BREEZY SHEET FROM TRENCHES

"The Listening Post," Published by Soldiers.

A FOUR PAGE PRODUCTION

Contains Many Amusing and Interesting Accounts of Happenings in the Trenches.

Through the kindness of G. H. Heslam, Arts '16, The Daily is permitted to review a copy of "The Listening Post," published by the 7th Battalion C.E.F. in France. The contents of this paper certainly indicate the presence of wit and humor at the front in spite of the severe nervous strain and constant danger in which the men live. The editor says: "Listening Posts and reconnoitring patrols are the only two sporting jobs that fall to the lot of the infantry."

A "want ad" to the following effect adorns the front page:

Wanted—Man and wife as caretaker for Canadian trench, which is in good repair. Man must be able to work a machine gun at intervals; wife to cook and send up starlings. Both must supply own gum, boots and mouth-organs. Wages for two, forty dollars per month and rum issue. No children in arms or without arms. Vancouver employment sharks please copy.

A large portion of the remainder of the front page is occupied by a thrilling account of a "Dastardly Daring Daylight Robbery in Seventh Battalion Frontline French. The thief or thieves succeeded in getting safely away with a valuable tin of butter, and up to the time of publication were still at large, though an important clue is being followed up. The victims' loss is partly covered by insurance and chloride of lime."

Among a list of questions under the heading of "Things We Want to Know," is the following: "How did the new warrior from Shorncliffe make out on his first job, i.e., tying the 'listening post' to the 'last post' with a yard of 'firing line'?"

The Listening Post has also a department devoted to the answering of correspondence. Space prevents us publishing these, but, needless to say, they are quite in keeping with the humorous character of the other articles.

The advertising column is graced with a brilliant ad setting forth all the excellent attractions of the so-called "Hotel Grandeverve de La Hun," the rules of which prohibit sleep and regular meals."

The "Ka-hoo-chi," or joke column, is one of the Listening Post's main attractions. The following is an example:

"We would like to know who it is who doubted a certain artifice of private's word as to his being well-bred. He is lousy enough to be all bread."

The rivalry and good-natured banter which continually exists between the various companies finds ample expression in the columns of the Listening Post. Below is an item of this nature:

"It is reported from No. 4 Company that the 'Whiz-phut' Mountain Battery in their rear has at last managed to hit the P. D. Farm. The Germans are known to be completely demoralized by this unexpected success to our arms. We have hopes now that the range has been obtained, and that by the new year quite a number of bricks will be knocked down, or at least damaged, by our gallant phut-tors."

A clipping from a soldier's diary would indicate that the private sometimes entertains bitter and hard feelings towards the occasional domineering officer. "Tuesday.—The Colonel has a heart like a Hun. I think he must be a German spy, judging from the way he made fun of a brave soldier. We were all lined up for inspection, and he gave us an awfully bad time. 'What's the matter with you?' he asked. 'I've been shot, sir.' 'Did you get the fellow who shot you?' 'No, sir.' 'Well, what do you mean by loafing around here? You go right back and get him. Up you go and the best of luck.'"

GOOD PAPERS ARE OFFERED

(Continued from page 1).

A brief history of the submarine and the dates of its introduction into the various navies of the world. The French were the first to make the innovation; their first undersea boat being built in 1888 (the year of the Kaiser's accession). Britain was reluctant in taking the step and did not do so until 1901, when it was decided to be absolutely necessary. Since that date, however, England has never looked back, and now has the largest and finest fleet of submarines afloat. Germany was even slower than England in realizing the possibilities of this method of warfare and did not consider the question seriously until 1907. Her ally, Austria, was two years slower, but had not begun to keep pace with the enormous strides of Germany and as a result possessed only 6 submarines out of the 26 in active service when the war began.

The submarine first came into prominence during the Russo-Japanese war when both sides made effective use of their submarine fleets; the present F. type, such as were made in Montreal recently have 6 torpedo tubes, and 5 quick firing guns, attaining a speed of 12 knots an hour.

Mr. Marotte dealt at some length with the mechanism of the submarine and then introduced the point as to whether submarine or surface vessels have the advantage in actual warfare. At the close of the paper this question was discussed by the meeting.

After the usual refreshments the meeting adjourned, all members feeling the opening meeting had been a decided success in every way, especially in the matter of having but two papers an evening with more time for discussion.

FENCERS START SEASON'S WORK

Good Number on Hand at First Practice.

SEVERAL NEW MEN OUT

Last Year's Fencers Spent Time Teaching Elements of Sport to Beginners.

The first practice of the Fencing Club, which was held yesterday at the Union was a decided success as regards new material. Wickenden, Terroux, Lowe, Macklin, Audette and Aggiman, of last year's club, were out and helped to instruct the beginners. One or two of the new men had also had some experience with the foils and took a hand in the coaching.

At the commencement of the practice the novices were lined up and each of the more experienced men took one or two of them and proceeded to show them the elements of the game. The proper position for "on guard," the lunge, and the two parries of quarte and sixte were explained, and the beginners were practiced in these and in changing quickly from one position to another. It usually takes some little time to learn these preliminaries thoroughly, but they are absolutely necessary before actual bouts can be indulged in. Most of the men grasped the idea of the various motions and positions readily and with some more practice should soon have done fencing before had a light practice between themselves.

Most of the men who were out yesterday were not provided with proper clothing, and prospective fencers are again reminded that running shoes are an essential for the sport. It is necessary to have a size footing and this cannot usually be obtained with ordinary boots. Clothing that will allow free movement of the arms and legs is also advisable. Yesterday the work was not of a very strenuous nature and it was possible to get along after a fashion without these matters being attended to, but everyone will be expected to come provided with running shoes at least, and gym clothes if possible at all future practices. The next class will be held on Saturday at 5 p.m., and all those who were out yesterday are requested to be on hand punctually, as well as any others who wish to take up the sport. Those men who would like to look up points they are not sure of in connection with the various attacks and parries are recommended to get Spalding's handbook on fencing by Senec. This little book, which may be obtained for a trifle, contains a great deal of information about the sport, and is illustrated with photographs showing the correct and incorrect positions. It will be found very useful by beginners.

Besides those mentioned above, the following men were among those out yesterday afternoon: F. C. Auld, E. A. Common, E. Blinds, M. Galt, J. A. Howard, T. J. Kelly, H. Mouquin, G. B. McLarty and F. M. Mooney.

ATHLETIC ASSOCIATION.

A meeting of the Athletic Association will be held in the Union at 5 o'clock to-day.

Silver Quilty Under the Knife

"SILVER" QUILTY.

An Ottawa despatch says that "Silver" Quilty, Ottawa's great line plunger and tackler, who starred for McGill last year, will enter the Water Street Hospital this morning to have a long-delayed operation performed on his leg for the removal of varicose veins. Quilty has been bothered all season, and each contest aggravated his trouble. After the Argonaut game here last Saturday he suffered a great deal, and on the advice of his physician decided to have the operation performed without further delay. He will therefore not be available for the Ottawa-Tiger game in Hamilton next Thursday.

ARTS ARE NOW OUT OF SERIES

Medicine Are Winners in Closely Contested Match.

MADDEN DOES GOOD WORK

Farthing, Donnelly and Patterson Likewise Play Excellent Game.

Evenly matched in almost every detail of the game, the teams representing the Faculties of Arts and Medicine which met yesterday afternoon at the Stadium in the first match of the inter-faculty series put up a rattling good exhibition when all things are considered. Medicine were the winners by the score of 9-0, the score being chiefly due to the good work of Dink Madden, the former Ottawa College man, whose running and dodging was one of the features of the game.

Neither team displayed a great deal of ability when on the defensive and yards were gained by bucking and line plays on almost every occasion. There was an abundance of loose handling of the ball and more times than one this resulted disastrously for the team at fault. Dink Madden was probably the best man on the field, the burly centre-half showing great headwork in his running. He could always be relied upon for yards. In kicking, however, he was excelled by Jack Farthing, centre-half of the Arts team, who also got off several nice runs for gains. Donnelly, on the Medicine line, as well as Slim Patterson and Punch Parkins played good football, as did also Fat Allen and Murphy MacCrimmon for the Arts' fourteen. George Upham on the Medicine half line also showed good form.

The game started at 4.15, with Arts having the advantage of the wind. From the start the Arts students rushed matters, Nicholson and Farthing both making gains. Medicine secured the ball through Arts' failure to give yards on Farthing's kick. Meds lose ball on forward pass. Arts buck for yards and lose ball on off-side. On Farthing's kick Madden runs through for 25 yards, repeating his performance a few minutes later. The game is delayed while Slim Patterson and Fat Allen have injuries attended to. The game ceases for some time. Finally Madden muffs the ball, but recovers and runs back fifteen yards. On Farthing's muff, Chantel drops on the ball and makes big gain for Medicine. Quarter time—Arts, 0; Medicine, 0.

Second Quarter. Shortly after the quarter opened, Madden kicks for a rouge. Medicine, 1; Arts, 0.

Arts make long gain on fake kick. Donnelly stopping bucks in fine style. McCrimmon goes through for yards. Twohey kicks for a rouge. Medicine, 2; Arts, 0.

Sullivan blocked Arts kick and got the ball. McGregor forced Farthing to rouge.

Medicine, 3; Arts, 0.

Half time—Medicine, 3; Arts, 0.

Third Quarter. The opening of this quarter marked by an interchange of kicks between Farthing and Upham. Donnelly made splendid tackle for yards. Meds, worked. Dink Madden goes through for 10 yards, then lost ball. Madden runs 25 yards. Pitts bucks for 15 yards. On straight bucks Arts made a show of Medicine's lines and marched down the field, only to lose the ball on Medicine's 15 yard line.

Fourth Quarter. Both teams showing effects of the hard grueling. Meds. gain on bucks and Parkins' end run. Madden secured ball on Arts 25 yard line and dodged through for a touch, which Patterson converted.

Medicine, 9; Arts, 0. Arts start another march down the field and situation for a time looks dangerous for Meds. On exchange of kicks Medicine gains. McCrimmon goes through for yards. Madden runs 15 yards. Pitts goes through for same distance, but loses ball. Arts gain yards but lose on off-side. Game over. Medicine, 9; Arts, 0.

The line-up: Medicine (9) Arts (0)
Upham Halves Henry
Madden Halves Farthing
Twohey Halves Rutherford
D. McGregor Fly wings Kicks
Sullivan Quarter MacLeod
Donnelly Wings Taylor
Patterson Wings Allen
Pitts Wings Swart

Dowd Scrimmage Fitzgerald
Referee—Billy Morrison.
Judge of play—Herb. Woolatt.
Timekeepers—H. A. Melville, McGibbon.

"Dan" Gillmor and "Venus" Lemay were on the field checking up the merits of the different players for the awards of letters.

PHILOSOPHERS TO MEET NEXT WEDNESDAY

Mr. Howard Honey to Give Paper at Next Meeting of Society.

The next meeting of the Philosophical Society will be held on Monday evening, the 15th inst., at 8.15, in room B, Strathcona Hall. The meeting will be featured by the reading of an instructive paper by Mr. Howard Honey, B.A., on "The Concept of a Law of Nature in Modern Science."

Mr. Howard Honey is a past executive member of the Philosophical Society, and while at the university always identified himself very closely with the society's activities. The paper promises to be an interesting one, and all interested are urged to keep the night open and attend. The executive have made arrangements to serve substantial refreshments during the evening.
